

metal line skirting board

To choose Metal Line means giving importance to details because they are the ones who make the difference. Metal Line is distinguished by its versatility and functionality, but also for its inspiration to contemporary design. It is an innovative line, rich of solutions with a wide variety of combinations and colours capable of satisfying every housing need, from small and large gathering places. Stainless steel and aluminium, materials that give shape, colour and size to the space, minimalist signs that follow the flow of everyday life. Metal Line can provide a continuum of profiles that integrate perfectly into environments and different styles, enhancing their aesthetic and architectural appeal. Metal Line becomes a trend line, thanks to Profilpas research on materials and shapes and to the attention of the company to the world of furniture and design.

skirting board metal line

Metal Line 90 is an aluminium skirting board, available in different finishes, that creates an elegant junction between the wall and the floor. Thanks to the curved section, this skirting board perfectly hides the perimetral expansion gap of a floating floor. Metal Line 90 is also available in white and black Trend Color Stone, two matt colours that perfectly match the most modern ceramic coverings. All the models can be curved through the specific Proflex Machine.

metal line

Metal Line 87/6 and 88/6 are two flush recessed skirting boards for plaster and plasterboards. Both are composed of two separate elements: a base in natural aluminium and an insert in silver anodised or matt white colour-coated aluminium. Once installed, the skirting board integrates perfectly into the wall surface, outlining the perimeter of the space without limiting it. There are two different phases of installation: the base element must be installed when the room is still in its rough state, while the chosen insert must be put after the laying of the floor.

Prolight Metal Line SKL/2 is a skirting board in aluminium with indirect LED light. Its special section allows to create an original play of light along the wall, thus adding value to the whole surface. In addition to the silver anodised and the white stone versions, SKL/2 is available in a wide range of colours including five original cement effects, two special metal tonalities and a white characterized by an extremely solid and full colour.

Metal Line 97/8 is a 8 cm high aluminium skirting board specially designed for housing cables thanks to the specific PVC cable trunking that, fixed to the wall with screws and dowels, also acts as support of the skirting board. It is particularly suitable for renovations as it avoids making new tracks for the passage of cables. It is also easy and quick to install only using natural aluminium supports that, fixed to the wall with screws and dowels, make the access to service cables easy.
